

FATIGUE RISK MANAGEMENT MANUAL

Ref No: AH/FRM/M/01
Issue: 01
Revision: 00
Issue Date: 01 April 2026

CHAPTER 5 FLIGHT AND DUTY TIME LIMITATIONS

5.1 GENERAL

AH Airways shall plan, monitor and control flight time, duty periods, flight duty periods, sectors, standby, positioning, deadheading, split duty, rest periods and cumulative limitations in accordance with the approved limitations contained in this manual.

No flight crew member, cabin crew member or other applicable crew member shall be scheduled, assigned, released or permitted to operate where the applicable flight time, duty time, flight duty period or rest requirement would be exceeded.

Flight and duty time limitations shall be monitored through the Company's in-house electronic portal and supporting operational records.

5.2 FLIGHT TIME LIMITATIONS

AH Airways shall not schedule any flight crew member, and a flight crew member shall not accept an assignment, where the total flight time in commercial air transport exceeds the following limits:

Operation	Maximum Flight Time in any 24 Consecutive Hours
Single Pilot Flight Crew	
Two-pilot flight crew	8 hours

For single-pilot operations, AH Airways shall apply a Company protective limit of not more than eight (8) hours flight time in any twenty-four (24) consecutive hour period.

This Company protective limit shall be applied in addition to the applicable flight duty period limits, landing limits, sector limits, cumulative flight time limits, rest requirements and fatigue risk controls contained in this manual.

The following cumulative flight time limits shall apply to each flight crew member:

Period	Maximum Flight Time
Any 7 consecutive days	34 hours
Any 28 consecutive days	100 hours
Any 12 calendar months	1000 hours
